

Instruction manual

Smartwatch for children with GPS locator,
calls and camera

www.gualaru.com

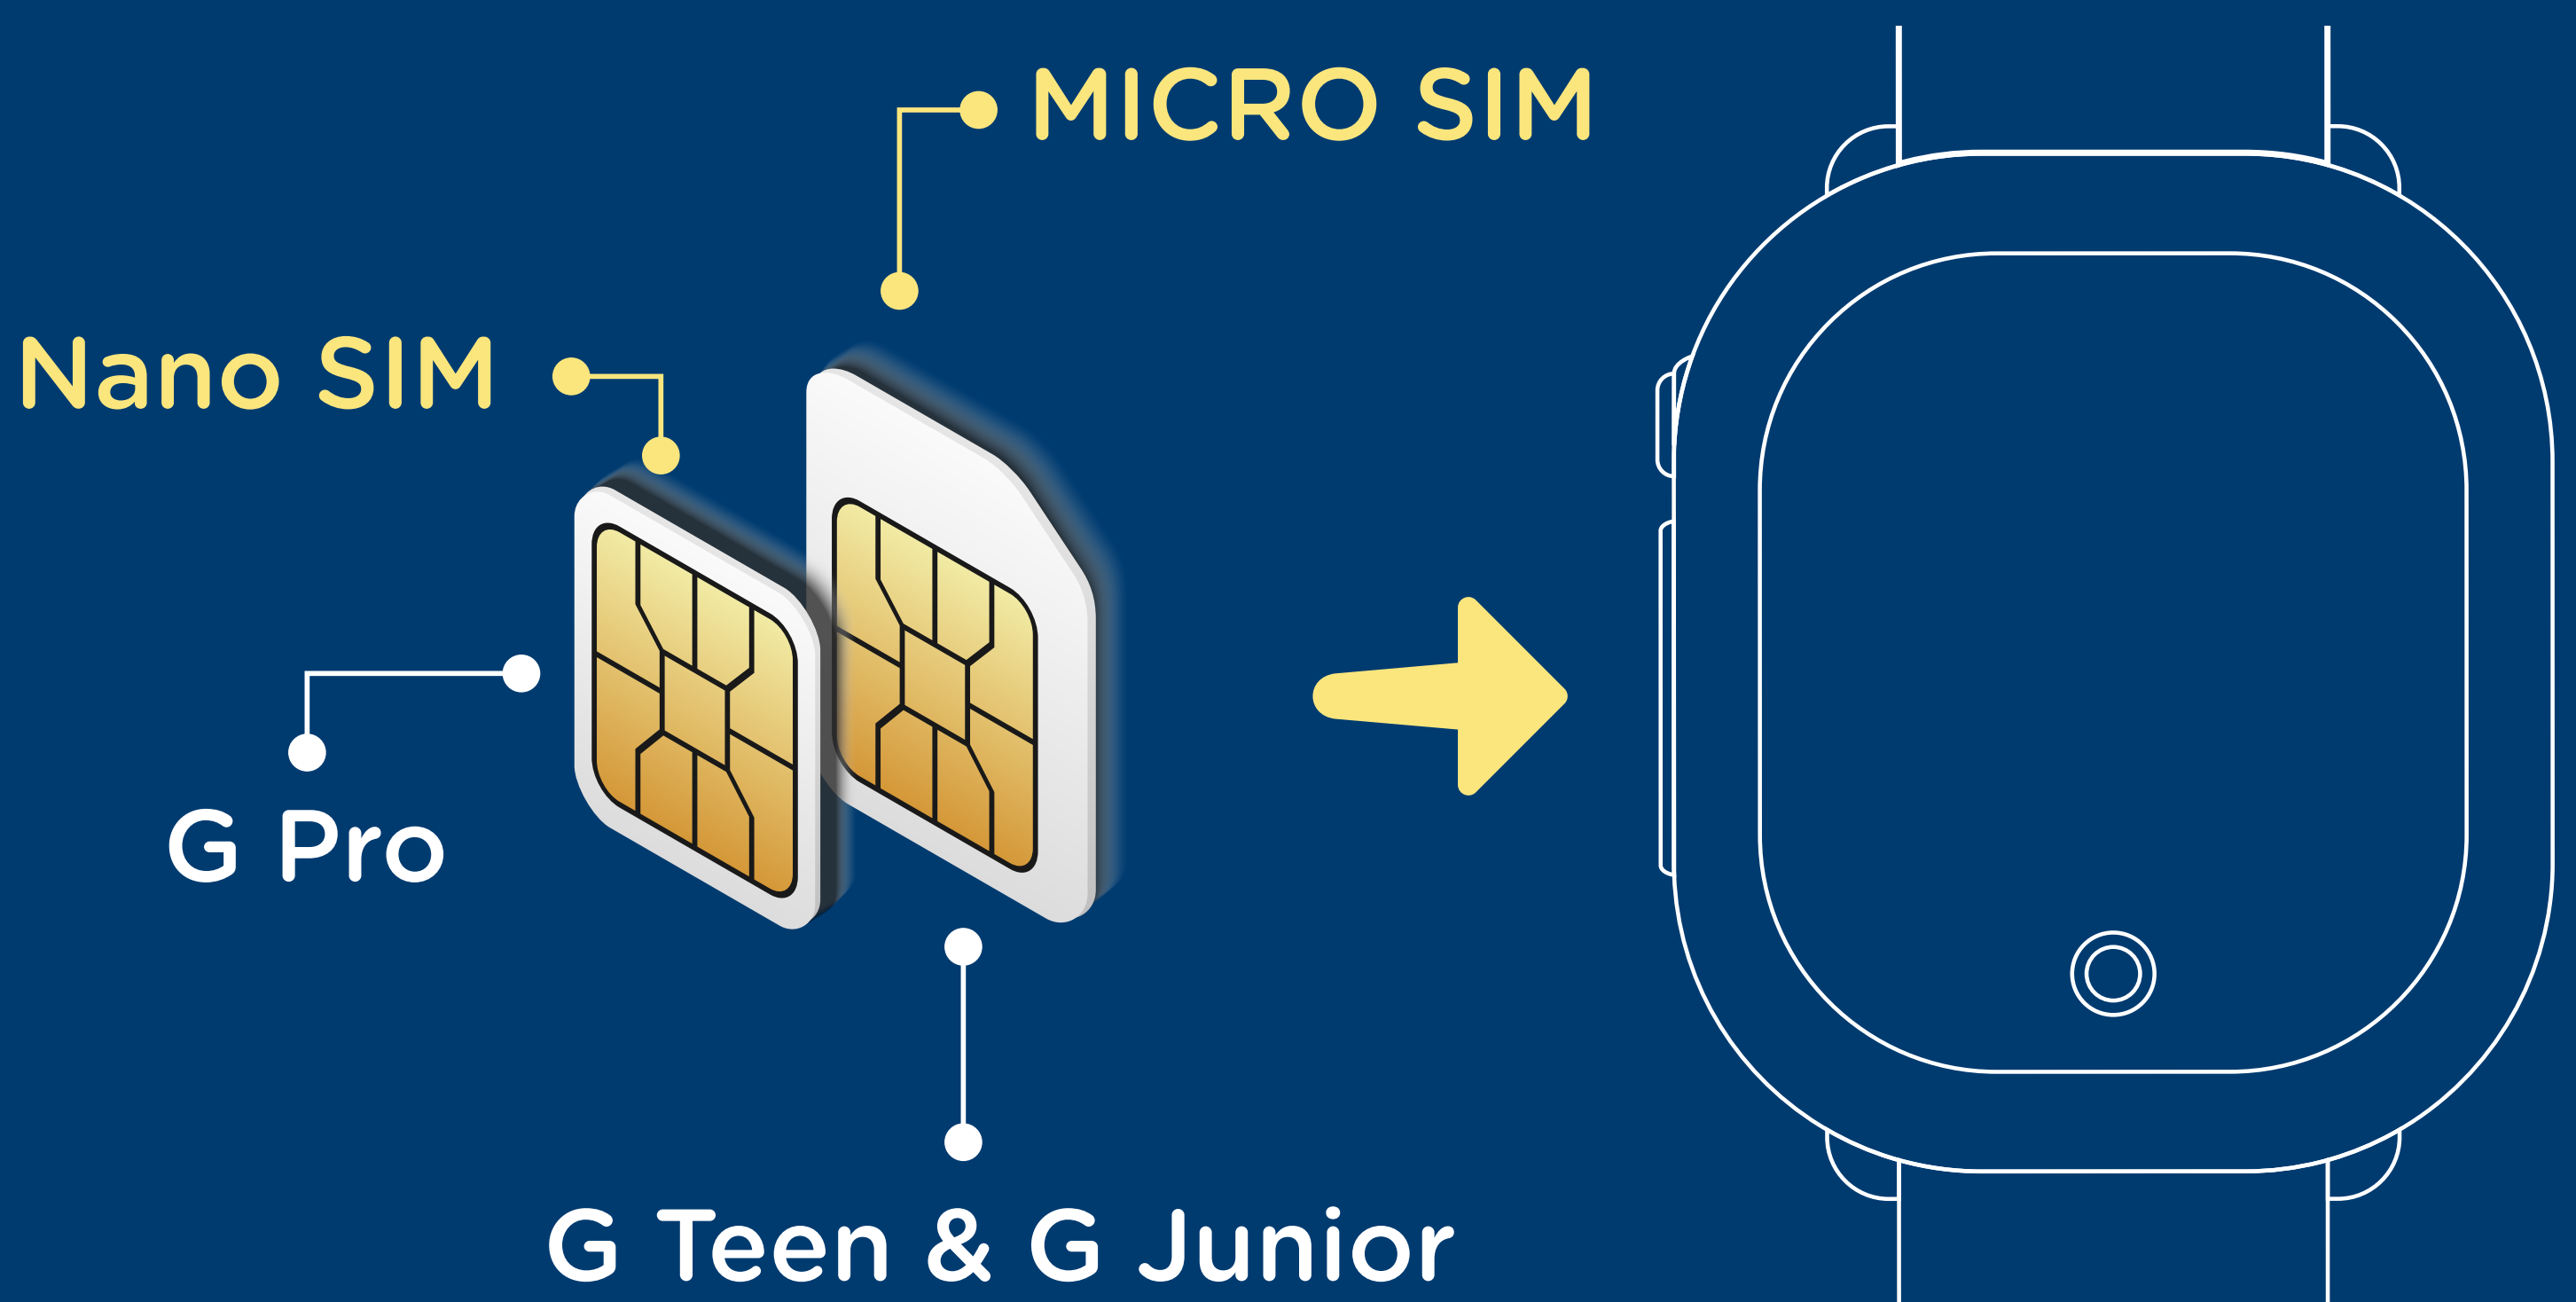

_ Configuration

- Apply for a SIM card at any dealer of mobile telephony that offers a configurable APN *Important: Smartwatch doesn't support duplicate SIM cards for simultaneous use on two devices

The SIM card can be a contract or prepaid, but you must sign up for at least 100 MB/month.

- Charge the watch battery for at least 3 hours using a USB charger or by connecting it directly to a computer.
 - Insert the Smartwatch's SIM card into your private mobile phone to **deactivate the SIM PIN code**; you will find it in the phone's settings. If you do not know how to deactivate the PIN, try a simple Google search: Disable PIN code for "Smartphone model".
- *Important, don't insert a NANO SIM in your Gualaru Smartwatch, use the adapter to convert the SIM to MICRO SIM. **With the clock off, insert the micro SIM as shown in the graphic** and with the help of the tweezers push the SIM until it is completely inside. Now turn on your Smartwatch, if it asks you to insert a valid SIM then repeat this process.

_APN

- If your SIM card has internet access but the APP shows "Offline device" then contact your phone company to request APN internet access activation.
- To configure the APNs yourself; turn on the clock with the built-in SIM card and sufficient coverage. Use your mobile phone to send the following SMS message to the number associated with the watch's SIM card:

```
pw,123456,apn,NAME_APN,LOGIN_APN,PASSWORD_APN#
```

- With the help of Google you can easily find the APN parameters for your operator, you would only have to search "APN settings (and the name of the operator).
- To link to the free Setracker APP, send the following SMS command:

```
pw,123456,ip,52.28.132.157,8001#
```

Attention: Write the SMS in lowercase without spaces. If you have sent the message successfully, the Smartwatch will reply with an SMS saying: OK! Otherwise, repeat.

Technical Specifications

- Location: GPS + WIFI + LBS + AGPS
- Water resistance: IP67*
- GPS Accuracy: 5-15 Metros
- Camera: 30 Ultrapixel.
- Material: Silikon
