

*"Never let
to dream and believe in you"*

MANUAL OF INSTRUCTIONS G-FIT IN ENGLISH

"Welcome to G-FIT, the new generation of activity and sleep bracelets with which children will have fun exercising and creating healthy habits"

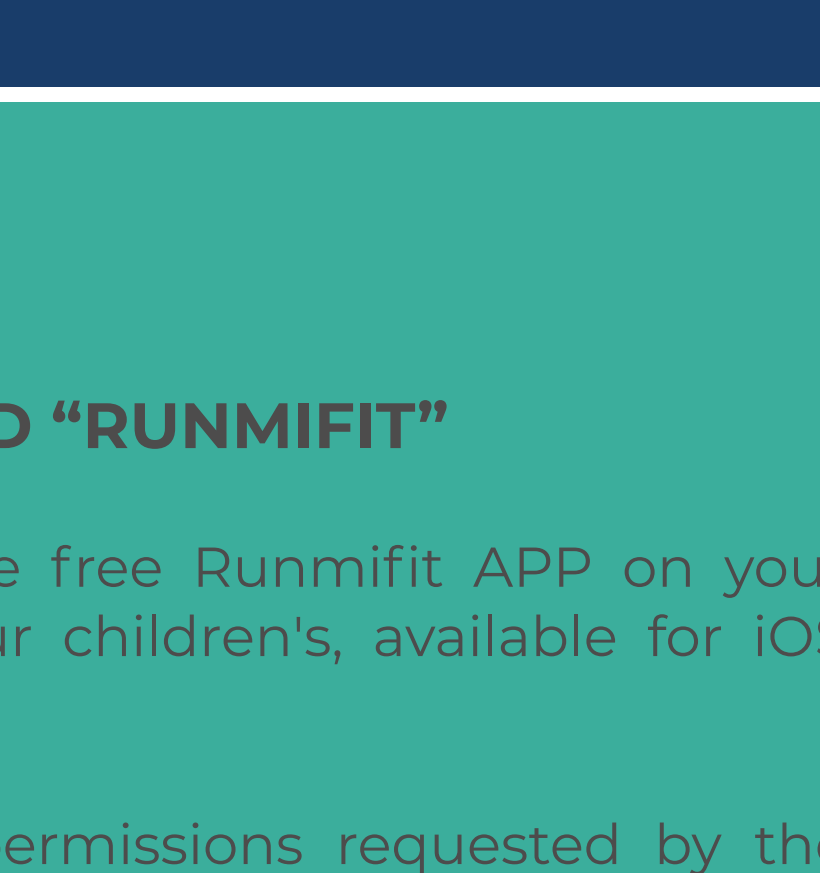

LET US BEGIN! | INTRODUCTION | OPTIONS | CONSUMER | FAQ

LET US BEGIN!

1 CHARGE YOUR DEVICE

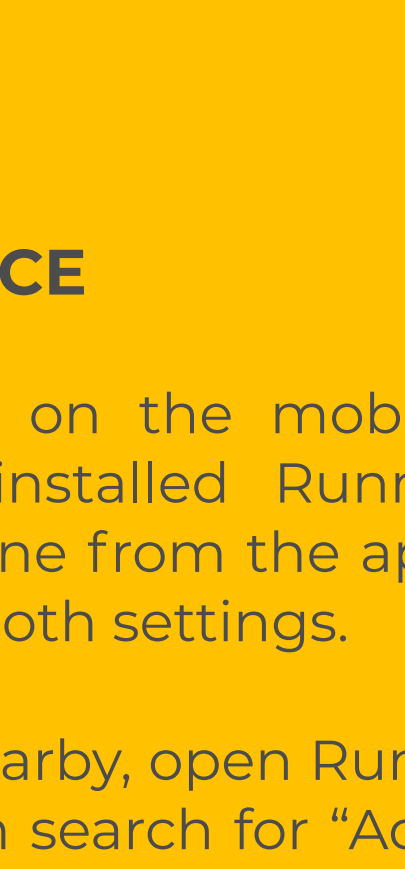

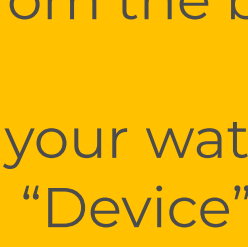

Locate two golden circles on the lower back of the sports band. Take the charger out of the box and bring it close to the circles, you will notice that they become magnetized, make sure it does not come loose and charge it on any USB power adapter.

The device may take 1-2 hours to charge.

2 APP

G-FIT is only compatible with the RUNMIFIT App

DOWNLOAD "RUNMIFIT"

Download the free Runmifit APP on your phone or your children's, available for iOS and Android.

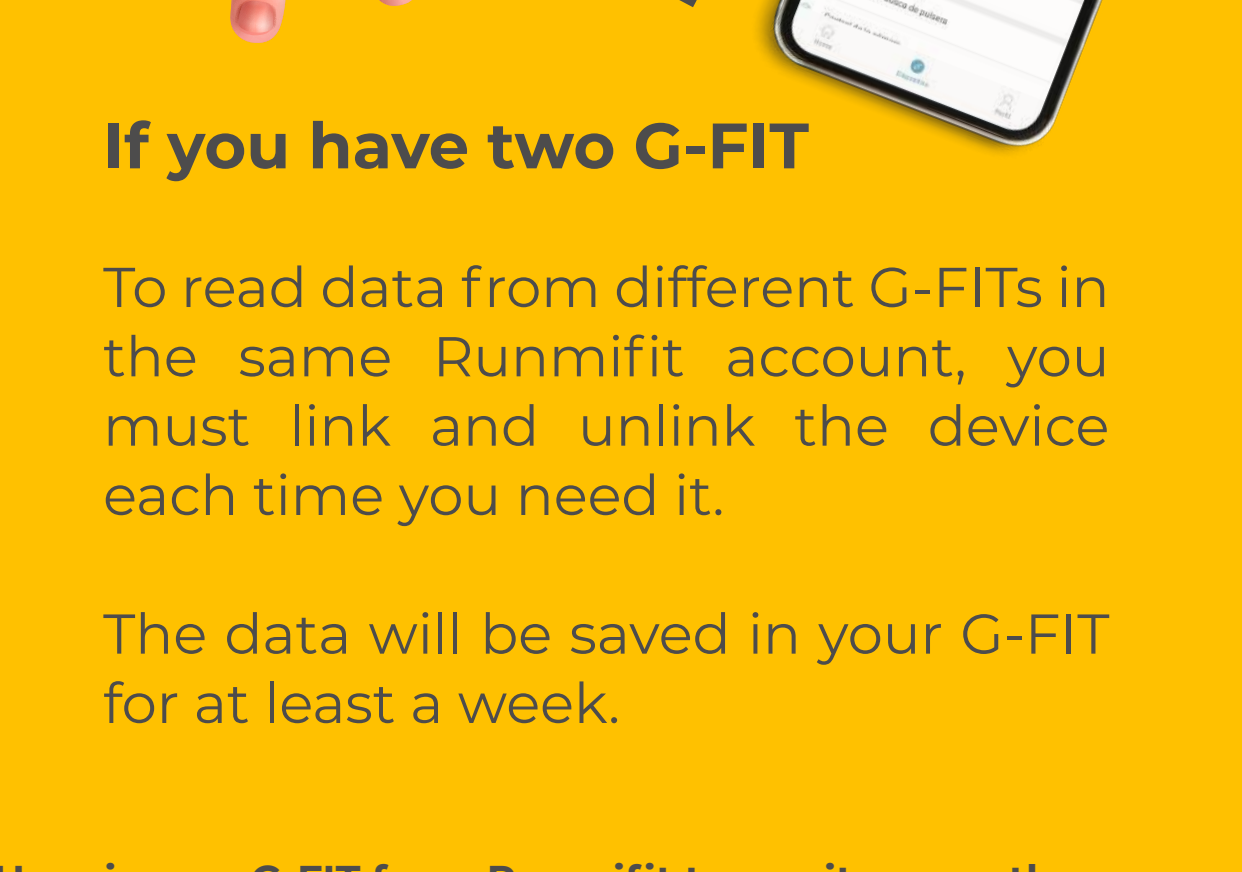

Accept the permissions requested by the application, otherwise it will not execute some of the functions.

3 LINK YOUR DEVICE

Activate Bluetooth on the mobile phone where you have installed Runmifit. The pairing must be done from the application, not from the bluetooth settings.

With your watch nearby, open Runmifit and go to "Device", then search for "Add device" and accept the location permissions.

Refresh the search page and select your device named S90-xxxx. Once paired it will start to sync the data, it will take a few seconds.

If you have two G-FIT

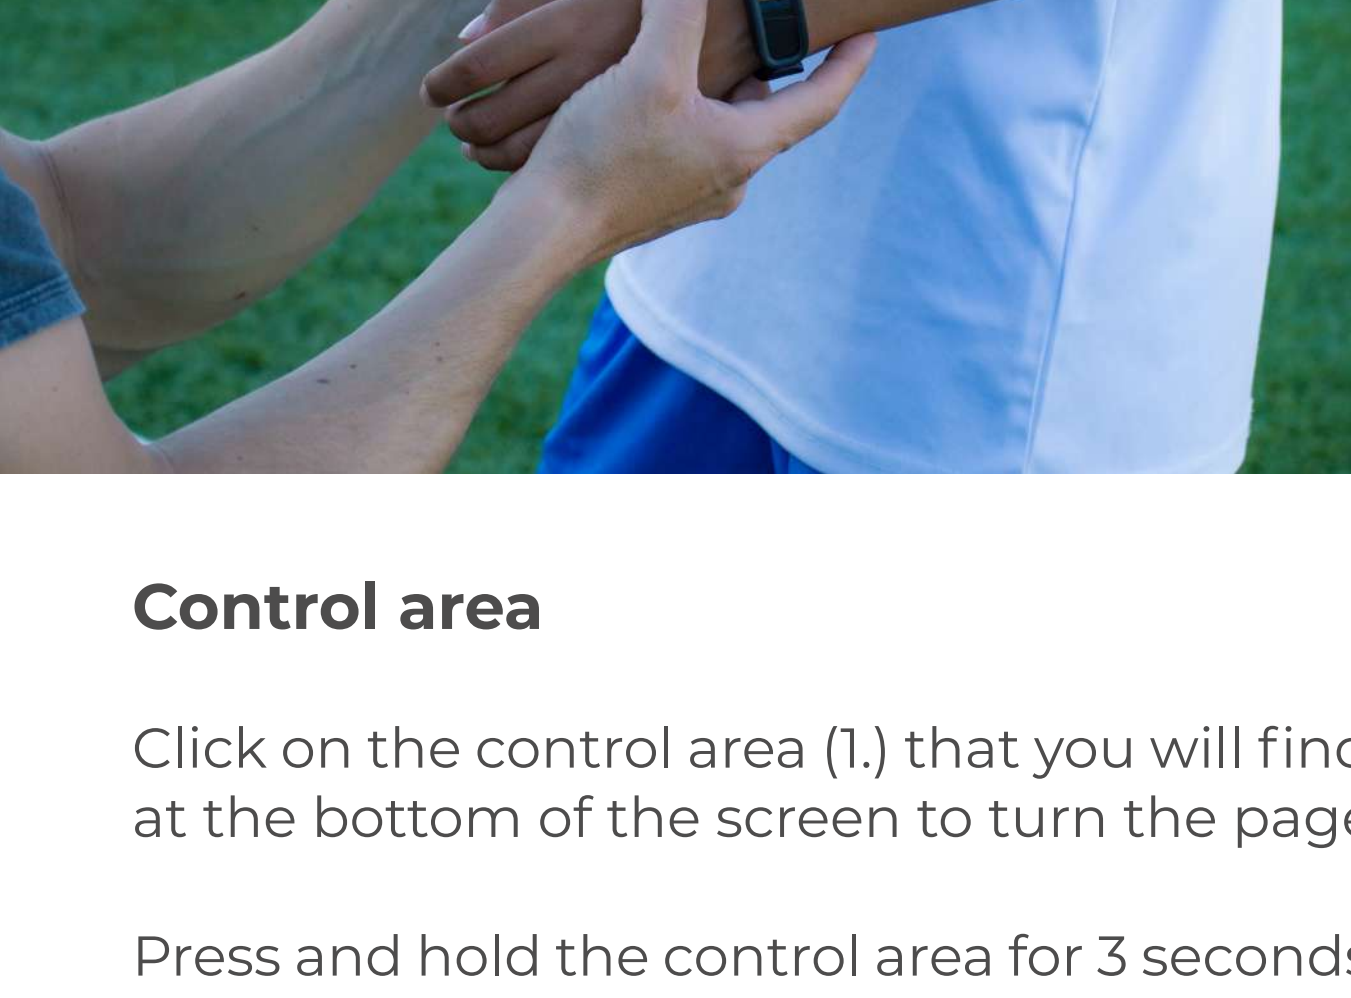

To read data from different G-FITs in the same Runmifit account, you must link and unlink the device each time you need it.

The data will be saved in your G-FIT for at least a week.

If you cannot find it when pairing G-FIT with the APP, it is possible that the permissions are not active or that your device is already linked to another mobile phone.

Unpair your G-FIT from Runmifit to use it on another mobile device.

Introduction to use

Collocation

Adjust the band no more than one finger's length from the wrist bone.

For more precision, place the G-FIT in your non-dominant hand. Being right-handed place to the left and to the right for lefties.

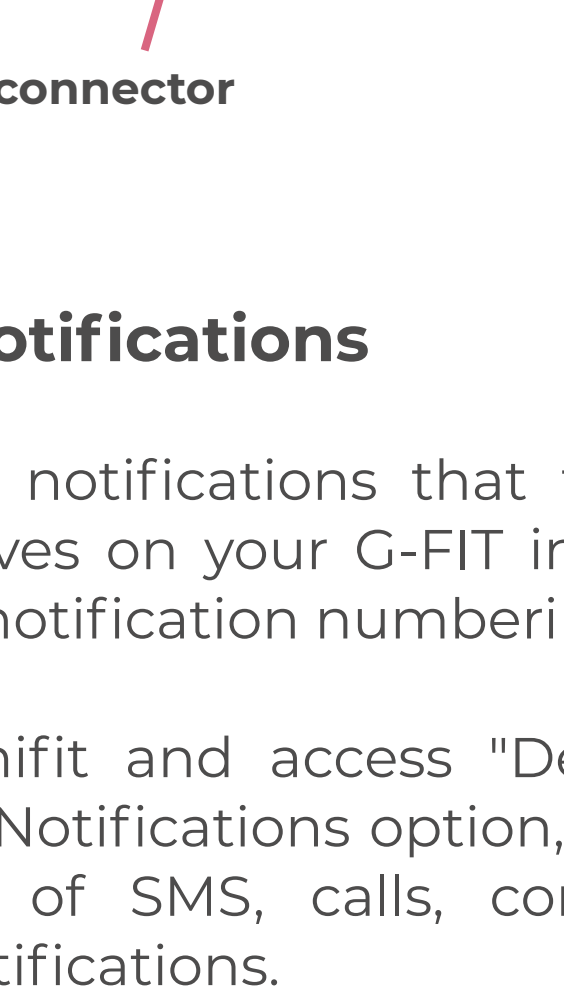

Adjust it to the diameter of the wrist without being too tight, but not loose either.

Your G-FIT resists water during a short exposure so you won't have to worry about washing your hands or showering.

Control area

Click on the control area (1.) that you will find at the bottom of the screen to turn the page.

Press and hold the control area for 3 seconds to start the activity, press once to pause it, or hold again for 3 seconds to end it.

2. Charging connector

How to take care of your band

Clean your strap and wrist with a non-soap cleaner on a regular basis.

Your G-FIT is water resistant but avoid getting it wet and above all do not use it for water sports.

If you notice that the device has stopped charging and won't turn on, clean the charging connector (2.) with a little alcohol or hydroalcoholic gel.

Activate notifications

Receive the notifications that the mobile phone receives on your G-FIT in short text format and notification numbering.

Open Runmifit and access "Device" then look for the Notifications option, accept the permissions of SMS, calls, contacts and access to notifications.

You can block this option at any time and choose the type of notifications you want to receive.

Remember that to receive notifications, the phone must have Bluetooth active and be close to your G-FIT band.

For the consumer

Contact

We have an open chat via WhatsApp to solve our customers' doubts or to process repairs.

contact@gualaru.com
+34 644 698 292

Warranty

Gualaru Always On S.L. complies with the European Trade Regulations according to which you have the right as a consumer to a three-year warranty for manufacturing defects.

Process a repair

If you have problems with your device and you need to arrange a repair, please contact our assistants via WhatsApp or Email indicating the order number and providing video or photographic evidence of your situation.

For factory defects the replacement or repair will be free of charge.

For configuration of the device or for damaged products you will have to pay the transport costs plus possible additional costs.

Warranty does not apply

Gualaru reserves the right to waive the costs for devices that have been submerged in water or liquids, have been knocked, the SIM card has been inserted incorrectly or the motherboard has been accessed and the warranty seal has been broken.

Express return

If the product does not meet your needs, you can request an express return within 14 days of receiving your order.

The device must be in the same condition in which you received it from Gualaru.

The economic refund of the order will be made within a maximum of 3 working days of receipt of the device. Remember that it can take up to 10 days for the payment to be registered in your bank.

Repair time

The technical team has 14 working days to check and repair your device after shipment. After 14 days of silence from Gualaru you can claim the replacement of the device or refund of the order.

- IP68 resistant to moisture and sweat. Avoid getting your device wet.
- Do not use your G-FIT for showering or water sports.
- Do not wear your G-FIT in hot places such as saunas, hot springs steam or long exposure to high temperatures.

Frequently Asked Questions (FAQ)

Why can't I find my device in "Add Device" in Runmifit?

You must pair to the device through the App not from your mobile phone's Bluetooth settings. If you have already done this simply turn off Bluetooth on your phone and turn it back on, this time search from the Runmifit App.

Make sure your device is turned on.

Make sure your device is not linked to another Runmifit account.

Make sure you have accepted the permissions of the App.

How do I identify the full name of my G-FIT?

If you have two devices you may need to know the full name to identify them in the App. To do this, log in to your G-FIT and navigate to the "MORE" option, then search for Bluetooth and you will see the full name starting with S90-.
